SITU ISLAND RESORT

Welcome to Situ Island Resort, Mozambique. Your ideal island holiday get-away specialising in scuba diving, fishing and relaxation.

Situ Island Resort was established by a group of like-minded business people, who escape their hectic lives and schedules for some real, down-to-earth relaxation. Corporate business people who need to truly get away from the rigors of a busy life, leaving the hustle and bustle where it belongs, and spending some time with family, friends and allowing life's stresses to melt away.

Situ Island Resort is situated in the Quirimbas National Park and marine reserve. The island is an eco-island promoting sustainable leisure and enjoyment for friends and family alike.

The resort consists of 8 chalets designed to sleep 2 people each. Each chalet has an en-suite bathroom consisting of a shower, toilet and hand basin. Each chalet leads directly onto the beach and many guests opt to enjoy their morning coffee in the temperate sea waters of Situ Island.

The resort is entirely powered by solar power, harnessing earth's natural energy for man's enjoyment. Through the installation of a desalination plant, the island creates its own clean water for use on the island. Bottled drinking water is provided.

The scuba diving at Situ Island Resort has been ranked by some of our highly travelled guests as world-class, comparable to diving the Red Sea. The island's boats are kept in superb condition further enhancing the diving and fishing experiences.

The cosy, comfortable, family-friendly feel of the island with a communal dining area called "the clubhouse" ensures that guests enjoy their delicious 3 meals a day in a relaxed atmosphere. The opportunity to truly savour ones food, whilst looking out on the tranquil ocean enhances the delicious flavours of Mozambican cooking and seafood just tastes better when it's so close to the sea.
